SUMMARY

- Frontend Architecture SME with 11+ years of experience leading technical strategy and high-level design for high-performance, large-scale web applications. Provides UI leadership for P1 initiatives by translating complex requirements into scalable, user-centric experiences. Architects resilient Micro Frontend ecosystems using JavaScript, TypeScript, and modern frameworks including React, Angular, and Vue, enabling faster delivery through build-once-deploy-anywhere strategies and shared libraries. Drives innovation through POCs, boosts developer productivity by 50%, and ensures end-to-end system quality through strong cross-functional collaboration and architectural leadership.

Seeking Staff Engineer, Tech Lead, Architect, or Engineering Manager role.

EXPERIENCE

Senior Tech Lead 02/2025 - Present
Bengaluru

Josys is known for SaaS and device management platform for corporate IT operations.

- Architected and drove adoption of a scalable **Micro Frontend (MFE) ecosystem**, implementing an **event-driven** layer with **contract-driven** interfaces to enable loosely coupled, independently deployable modules while accelerating delivery and standardizing frontend architecture.
- Owned and evolved the Frontend Platform, enforcing standards via ESLint, Prettier, and TypeScript; established scalable patterns and standardized practices across state, API contracts, CI workflows, **SSR**, **a11y**, **i18n**, **SSE** and performance - improving release quality and driving consistency and adoption across teams.
- Boosted developer **productivity by 50%** and cut feature delivery **speed by 30%** by integrating **AI-driven engineering practices**, **Trunk Based Development** and automation tools in a fast-paced startup environment.

Tech Lead 12/2022 - 01/2025
Bengaluru

- Leveraged **React**, **NextJS**, **Webpack**, **Turbopack**, **TypeScript** to build scalable, reusable component libraries and internal tooling, significantly enhancing product development efficiency and consistency.
- Architected and led the development of the in-house design system using **React** and **TypeScript**, ensuring UI/UX consistency, **modularity**, and **accessibility** standards across all apps.
- Engineering the "Paved Road" for product teams by building unified **WebSDKs**. Standardized the implementation of **Observability**, **Feature Flagging**, Analytics, Metrics Collection and Error Handling across the organization.

Senior Software Engineer 05/2022 - 11/2022
Bengaluru

Cisco is a global leader in IT and networking

- Engineered core modules for the Cisco SDWAN vManage Application using Angular supporting thousands of enterprise clients and improving system reliability by 20%.
- Mentored and onboarded newcomers for vManage app.
- Reduced code review turnaround time by 20% by implementing standardized frontend best practices and automated linting workflows across 3 cross-functional teams.

Senior Software Engineer 10/2021 - 05/2022
Bangalore, India

Infoblox provides network control solutions for businesses

- Worked as module owner for On-prem in BloxOne product and was responsible for tasks like feature addition, **unit testing**, improvement etc.
- Responsible for taking **critical decision** for UI related implementations and **UX reviews**.
- Contributed to team building and mentorship by interviewing engineers across India and the US, conducting rigorous code reviews, and enforcing best practices.

SKILLS

Frontend (Primary)
JavaScript | React | TypeScript | Angular | Next.js | CSS in JS | React Testing Library | Web Component | Vue | Webpack | Vite | Cypress | Jest

Cloud & DevOps
AWS (S3, CloudFront) | Kubernetes (K8s) | Docker | Jenkins | Subresource Integrity | Helm Chart | Makefile | Nginx

Backend
Node.js | GraphQL | Python

KEY ACHIEVEMENTS

Achievement in Recognition Programs
Most Valued Peer Award at Josys.
Spot award from Infoblox.
Travel and Hospitality Icon Award from Cognizant.

Hackathon Achievements
Participation in various Hackathon Challenges achieving multiple awards demonstrating innovation and creativity

LANGUAGES

English	Proficient	●●●●●
Hindi	Advanced	●●●●●
Bengali	Native	●●●●●
French	Intermediate	●●●●●

EDUCATION

Bachelor Degree in Computer Science
West Bengal State University
2008 - 2011

BREAK

Pursued a year of personal development through travel and independent learning in web technologies.
2012 - 2013

EXPERIENCE

Software Engineer 2

04/2020 - 09/2021

[Infoblox](#)

Bangalore, India

- Spearheaded the migration of the monolithic BloxOne application to a **Micro Frontend** (MFE) architecture, increasing application performance by 30% for 50 critical apps.
- Increased application onboarding efficiency by 30% by building custom **Angular schematics** to automate MFE transitions with a single command.
- Led **UI architectural** decisions and UX reviews, shaping a consistent, user-centric experience across all modules.
- Enhanced CDN security using **Subresource Integrity** (SRI) and Content Security Policy (CSP) for CloudFront and S3 deployments.

Associate at Digital Engagement Practice

08/2014 - 01/2020

[Cognizant Technology Solutions](#)

Kolkata

Cognizant is a leading provider of information technology, consulting, and business process services

- Built enterprise-grade Single Page Applications using Angular Material, React, and Redux.
- Improved user engagement by (25%) by designing interfaces using Google Maps APIs for location-based functionality.
- Contributed to RESTful APIs using Python, enabling seamless front and back-end integration
- Won multiple internal Hackathon Challenges showcasing innovation under pressure

UI Developer

06/2013 - 08/2014

[ICRA Techno Analytics Ltd](#)

Kolkata

ICRA Techno Analytics provides software solutions for companies

- Built functional web applications using JavaScript, HTML and CSS
- Established user interface design and architecture using wireframes, mock-ups, and prototypes

MAJOR PROJECTS HIGHLIGHT

Josys In-House Design System

- Built and maintained a React + TypeScript component library adopted across multiple teams, driving ~80% component reuse, reducing UI development effort by 30-40%, and enforcing accessibility and design consistency at scale.

Custom Angular Schematics Library

- Increased application onboarding efficiency by (30%) by developing library for automating Angular to Micro Front-end transitions.

Monolithic to Micro Front-end Migration

- Led a transformation from monolithic to micro frontend architecture using Single-SPA, AWS, Jenkins, and Kubernetes.
- Increased application performance by 30% through leading deployment initiatives for several critical Apps.
